

RM-10870 from the National Conference of Volunteer Examiner Coordinators was already presented last Fall to the FCC in RM-10787. Therefore, I disagree and do not support this petition. It is basically a copy of the ARRL proposal with no CW testing for Extras. They also proposed adding larger phone privileges for all Classes to try to gather support for their petition.

RM-10870 does not represent the best interest of ham radio. Therefore, I ask you to not consider any portion of this petition. On a personal note, I feel that this proposal is self serving to the NCVEC because they feel that it will create more testing opportunities but this will not better the hobby.
